## ABOUT THE CENTER

Increasing the pipeline of young women in leadership roles is a key strategic goal to achieve a gender balance at all levels in organizations. Studies have shown that a young woman's career choice is often influenced by perceptions that occur early in life.

The Jane Brock-Wilson Women in Management Center supports women from pre-college throughout their careers and prepares future leaders to navigate and lead a gender-diverse workforce.

The Center is named in honor of Krannert alumna and women's advocate Jane Brock-Wilson, Managing Director of Berkshire Partners.
